PROFILE

Product Designer specialized in **Design Systems** who also ships **frontend code**. 6+ years in **UX/UI and product design** across **gaming**, **open source** and **Web3**, designing for the web since 2010. I take products from **user research** and **prototyping** to **design tokens**, **component libraries** in **React** and **TypeScript**, and **AI-assisted workflows** with Figma MCP. Background in **Law**, with an eye for privacy and consent in product flows.

AI-generated components matching the design system first pass

100k+
installs on RemoteWork, Android app in 8 languages

EXPERIENCE

Frontend Developer & Design System Owner

Aug 2025 — Oct 2026

CoinFello · Remote — United States

Owned the **design system** end to end: designed it and implemented it in code, on a team distributed across the US and Europe.

- Built the **design system**: **token architecture**, **component library** and the conventions that keep the interface coherent and **responsive** across desktop and mobile.
- Implemented the system myself in typed **React**, **TypeScript** and **SCSS**.
- Turned the design system into context an **AI agent** could build from: a rulebook committed to the repository and components read straight from **Figma through MCP**. Around **70–85%** of generated components matched the system on the first pass.

Skills: Design Systems · AI · Figma · TypeScript · React · SCSS

Frontend Developer

Nov 2024 — Jul 2025

HyperPlay · Remote — Texas, United States

Moved from the design team into engineering on the same product, working on the **HyperPlay Game Launcher** interface with the engineering team.

- Worked in **TypeScript** and **React** on the interface I had previously helped design.
- Carried **design system** knowledge across the **design/engineering** boundary.

Skills: Design Systems · Gaming · Figma · TypeScript · React · SCSS

Product Designer

Sep 2022 — Nov 2024

HyperPlay · Remote — Texas, United States

Product design for a **game launcher** inside a design team.

- Ran **user research** and **user interviews**, and turned the findings into **user flows** and **interactive prototypes** the team could argue with before anything was built.
- Responsible for the **design system** within the design team (**token architecture**, library and documented states) and built components for it, keeping it usable by the engineers consuming it.
- Ran content and **player support** for over a year, troubleshooting with players and game developers, which fed straight back into the design.

Skills: Design Systems · Prototyping · UX Research · Gaming · Figma · TypeScript · React · SCSS

SKILLS

Product & UX

Product Design · UX Research · Usability Testing · Prototyping · User Flows · Information Architecture · Discovery & Problem Framing · Game & Launcher UI · Design Critique

UI & Systems

Design Systems · Design Tokens · Component Libraries · Figma · Figma Variables · Documentation · WCAG 2.2 AA · Accessibility · Motion & Interaction

Engineering

React · TypeScript · Next.js · Tailwind CSS · SCSS · Electron · Lua

AI

AI-assisted Workflow · Claude Code · Figma MCP · Agent Context / Rulebooks

UX/UI Designer → Frontend Contributor

Dec 2020 — Present

Heroic Games Launcher · Open source — Remote

Validation research, design and frontend on an **open-source** game launcher with **500,000+ monthly users** across Linux, Windows, macOS and Steam Deck.

- Led the **validation research** in 2020 (**desk research** plus **interviews with Linux users**), which established that the product was worth building.
- Created the **branding** and all the **UI components**.
- Primarily responsible for approving **UI pull requests** (PRs).
- Contribute as a **Frontend Developer**, leading the **redesign** process, adapting components and building **design systems**.

Skills: Design Systems · Prototyping · UX Research · Gaming · Figma · TypeScript · React · SCSS

Product Designer & Frontend Developer

2025 — Present

RemoteWork & HeavyMuscle · Independent — Google Play

Two **Android apps** live on Google Play. Designer and frontend on each since before either existed, including the store graphics, and part of deciding what gets built.

- **RemoteWork**: remote jobs from five boards in one list, with an application tracker and a CV builder inside the app. **100,000+ installs**, **8 languages**.
- **HeavyMuscle**: a gym app with an **AI coach** that writes the plan, 873 animated exercises, and an **offline-first** logging screen designed to be used standing up with no signal.
- Designed every screen in **Figma** first and built the **component layer** underneath, producing the graphic material for both store listings.

Skills: Design Systems · Prototyping · Figma · Health · TypeScript · React · SCSS

UI/UX Designer

Oct 2021 — Nov 2022

Starbreeze Entertainment · Stockholm, Sweden

Quality-of-life **UI/UX** on **PAYDAY 2**, a live AAA title in active development, designed and implemented.

- Proposed an **accessibility** improvement for players with motion sickness.
- Tested the game as a player to find real friction, and designed **quality-of-life** and **menu** improvements for a player base with a decade of habits.
- Made the game's **2D assets** (icons, illustrations, in-game items) in Photoshop and Illustrator and brought them into the build myself through the in-house engine, **Diesel** (**Lua**).

Skills: UI/UX Design · Game UI · Photoshop · Illustrator · Figma · Diesel · Lua

EDUCATION

2025 — 2026
Postgraduate — Information Technology
Rocketseat

2023 — 2024
UX Design Upskill
Hyper Island · Stockholm, Sweden

2022 — 2023
Business Development, Digitalization & Sustainability
Hyper Island · Stockholm, Sweden

2022
UX and Product Design
Berghs School of Communication · Stockholm

2018
Bachelor of Laws (LL.B.)
Brazil · Internships: small claims courts, Regional Labour Court and Public Prosecutor's Office of Alagoas

User Interface Designer

Feb 2016 — Nov 2018

Freelance · Alagoas, Brazil

Design and build for direct clients (websites, brand marks and image work), end to end.

- Built client **websites** on **WordPress** and **Joomla** from design to live site.
- Designed **logos and brand marks** for small businesses.
- Photo retouching and image preparation in Photoshop.
- No hand-off to anybody: whatever I designed, I was also the one who shipped it. That habit started here.

Skills: WordPress · Joomla · HTML & CSS · Adobe CC

EARLIER

Graphic Designer

2011 — 2012

COLET Sistemas de Gestão Empresarial

Company logo, website, direct mail, social channels, Google Ads and Google Analytics.

Graphic Designer

2010

Instituto Federal de Alagoas

Banners, logos and the institute's website.

Web Designer

2010

O Consolador (NGO)

Redesigned the website and blog in HTML and CSS.
